

MODEL 18-650 AIR HAMMER

About the Model 18-650

Originally built for the dock building industry, Pile Master air hammers are designed for driving timber, h-pile, pipe, and prestressed concrete piles. The model 18-650 hammer is specifically designed for driving timber and vinyl/fiberglass piles. With a total weight of only 1,300 lbs. the Pile Master Model 18-650 delivers up to 975 ft. lbs. of energy, making it a great choice for driving piles with limited equipment lifting capacity. Pile Master air hammers are known for their efficiency, producing up to 90% energy transfer into the pile while using an air compressor as small as 125 CFM.
